MAINTENANCE

Professional Restroom Sanitization Service

WEEKLY • MONTHLY • QUARTERLY

FACT

The number one building maintenance complaint is unsanitary restrooms.

Why worry about your restrooms when you don't have to? Let Regal Maintenance take that burden off your staff. We understand the importance of a clean, sanitary, presentable restroom for your customers and employees. With this always in mind, you can rest easy knowing that Regal Maintenance is getting the job done right.

Proper restroom hygiene is critical in today's business environment.

THE PROBLEM

Poor soil removal and worker contact with bacteria resulting in a less than sanitary restroom.

Traditional cleaning methods are inadequate to meet today's expectations of clean. Wipers and mops simply spread contaminated water around, failing to penetrate the nooks and crannies. Only a small portion of soil is removed, leaving behind urine and other harmful odor causing bacteria.

THE SOLUTION

Regal Maintenance and the revolutionary Kaivac™ restroom sanitization system.

Regal Maintenance has over 15 years in the industry serving southern New Hampshire. Our crew of trained, experienced cleaning technicians will thoroughly sanitize your restrooms by capturing and removing soil, bacteria, uric acid and other harmful odor-causing pollutants. Our restroom sanitization system is many times more effective in reducing bacterial contamination than the use of spray cleaners, wipers and mops.

Whether you choose weekly, monthly or quarterly restroom sanitization, you can be confident that we will get the job done right! **Guaranteed!**

Experience the **REGAL CLEAN**

Attention to detail from a trained, experienced cleaning technician.
